

Question: Which of these is the **biggest** loss?

ANSWER: All of them.

Loss is loss no matter how you look at it. And every one of these losses makes a unit less ready to complete the mission and takes another Soldier out of the fight.

Composite Risk Management, or CRM, is a process that looks at all types of risk, from a Soldier in combat, to accidents during training, to drunk driving when off duty.

CRM enables you to get a clearer, more complete picture of the threats or hazards around you, so you can Own the Edge by making better-informed risk decisions.

So study and apply CRM.

When the moment of decision arrives, this is one test you can't afford to fail.
